CONDITIONS OF SALE

1. All bids to be PER LOT as numbered in the Catalogue.
2. The highest bidder to be the buyer; in all cases of disputed bids the lot shall be resold, but the Auctioneer will use his judgment as to the good faith of all claims and his decision shall be final. He also reserves the right to reject any fractional or nominal bid which in his judgment may delay or injuriously affect the sale.
3. Buyers to give their names and addresses and to make such cash payments on account as may be required, in default of which the lots purchased to be resold immediately.
4. The lots to be taken away at the buyer's expense and risk within twenty-four hours from the conclusion of the sale, and the remainder of the purchase money to be absolutely paid on or before delivery, in default of which The Anderson Galleries, Incorporated, will not be responsible if the lot or lots be lost, stolen, damaged, or destroyed, but they will be left at the sole risk of the purchaser, and subject to storage charges.
5. To prevent inaccuracy in delivery, and inconvenience in the settlement of purchases, no lot will be delivered during the sale.
6. All lots will be exposed for public exhibition in The Anderson Galleries before the date of sale, for examination by intending purchasers, and The Anderson Galleries, Incorporated, will not be responsible for the correctness of the description, authenticity, genuineness, or for any defect or fault in or concerning any lot, and makes no warranty whatever, but will sell each lot exactly as it is, WITHOUT RECOURSE. But upon receiving before the date of sale, expert opinion in writing that any lot is not as represented, The Anderson Galleries, Incorporated, will use every effort to furnish proof to the contrary, and in default of such proof the lot will be sold subject to the declaration of the aforesaid expert, he being liable to the owner or owners thereof for damage or injury occasioned by such declaration.
7. TERMS CASH. Upon failure to comply with the above conditions any sum deposited as part payment shall be forfeited, and all such lots as remain uncleared after twenty-four hours from the conclusion of the sale, will be resold by either private or public sale at such time as The Anderson Galleries, Incorporated, shall determine, without further notice, and if any deficiency arises from such re-sale it shall be made good by the defaulter at this sale together with all the expenses incurred thereby. This condition shall be without prejudice to the right of The Anderson Galleries, Incorporated, to enforce the contract with the buyer, without such re-sale.
8. BIDS. We make no charge for executing orders for our customers and use all bids competitively, buying at the lowest price permitted by other bids.
9. The Anderson Galleries, Incorporated, will afford every facility for the employment of carriers and packers by the purchasers, but will not be responsible for any damage arising from the acts of such carriers and packers.

*Priced Copy of the Catalogue may be secured for fifty cents
for each session of the sale*

SALES CONDUCTED BY MR. FREDERICK A. CHAPMAN

INTRODUCTION

THE public exhibition of two important collections of armor, one in the Metropolitan Museum of Art in New York, and the other in the Museum of Art in Cleveland, has greatly stimulated the collecting of armor in the United States. The American mind has always turned to mechanics and what may be called the logic of mechanics. The chief interest in armor is not historic or artistic. Associations and decorations are comparatively irrelevant. The real interest is the sense of logic that has directed the construction of every weapon or piece of armor. Every improvement in protective armor is reflected in a new weapon of attack, and *vice versa*. To make a cutting or thrusting weapon more effective has often been the result of generations of effort. Defence and defiance have continually struggled for supremacy.

Some weapons, of course, may be considered as works of art, the greater number on account of the quality of their decoration, a minority through a strange rhythm that the logic of technique has impressed into them. There is nothing more beautiful than certain detached pieces of armor of the late fifteenth century. The hammered and shaped steel has an abstract and almost virginal purity of line. There is no doubt that the craftsman who wrought with the steel to shape his piece of armor had an instinctive feeling of the beauty which he created, although he was not able to shape in words what the subtler mind of the epigones is able to analyze.

The present collection was formed in Austria. It contains a number of specimens acquired from the collection of the Archduke Charles of Austria. It has also been enriched by a series of very fine halberds formerly in the National Armory in Munich. The collection has been catalogued by two European experts, Dr. Gross, curator of the collection of armor in the Vienna Museum, and the well-known expert Dr. Rupprecht of the Dorotheum in the same city. The present catalogue is based on their accounts, and the initials (G) and (R) indicate the source of each description. The halberds have been expertised and identified by Dr. Stocklein, of the National Armory in Munich.

The catalogue is particularly rich in Venetian and South German weapons, and weapons of the Balkan countries,—territories that were formerly Austrian or under Austrian influence.
